

Special Issue

Intelligent Dies, and Measurement and Visualization of In-Mold Phenomena

Review

■ Visualization of Phenomena in Molds—Casting—	Itsuo OHNAKA	171
--	--------------	-----

Lecture

■ The Present Status of Servo-Press and Its Effects on Die	Junichi ENDOU	175
--	---------------	-----

■ Measurement of Metal Forming Process Based on Information of Die	Ming YANG	179
--	-----------	-----

■ Measuring for Molten Metal Behavior in Die Casting	Hiroaki IWAHORI and Yasushi IWATA	183
--	-----------------------------------	-----

■ Visualization and Measurement Technologies inside Injection Mold	Hidetoshi YOKOI	188
--	-----------------	-----

■ In-Process Sensing of Supporting Load Distribution of a Large Deep Drawing Die with a Multipoint-Die-Support System, Simulation of Elastic Die Deformation, and Their Fusion	Tomoaki ANDO, Noriyuki NAKAOKA and Takahiro OHASHI	193
--	--	-----

■ My Experience in Precision Engineering	Nagao SAITO	199
--	-------------	-----

■ Gravure & Interview	Gunma Industrial Development Center Katsumasa SAITO/ Gunma University Hiroyuki KUMEHARA Interview : Takahiro OHASHI	167
-----------------------	---	-----

■ Introduction to Precision Engineering	Review of Surface Roughness Tutomu MIYASHITA	201
---	---	-----

■ Introduction of Laboratories	The Institute of Physical and Chemical Research, Materials Fabrication Laboratory Precision Medical Engineering Laboratory (Tsuchiya Lab.), Precision Engineering, Tokai University	206 208
--------------------------------	--	------------

● International Conference Report	198
● JSPE News	200
● Information	291
● From the Lecture Committee	告 2-1
● Editor's Note	告 2-42
● JSPE Membership Guidance	卷末

Paper

- Driving the Microdisk by Photothermal-Effect (1st Report) ————— 210
—Excitation of Standing Wave and Traveling Wave on a Microdisk—
Rai ITOH and Hirokazu TSUJI
- Study on Machining of Large Acrylic Lens ————— 215
Tomonori KATSUTA, Seiichi YOKOMIZO and Makoto SASAKI
- Study on high efficiency machining with reaction-free Shuttle Unit ————— 220
Kenzo EBIHARA, Akira YAMAMOTO, Tomohiko KAWAI and Yoshimi TAKEUCHI
- Hardmilling with cBN Tools ————— 226
—Studies on High Speed Endmilling (2nd Report) —
Akira HOSOKAWA, Masato OKADA, Syusuke KITAGAWA, Ryutaro TANAKA and Takashi UEDA
- Effects of MQL on Drilling (1st Report) ————— 232
—Features of Drilled hole—
Tadashi MAKIYAMA, Katsuhiko SEKIYA, Keiji YAMADA and Yasuo YAMANE
- Fabrication of Micro Ni-W Electroplated Diamond Tools and Their Application to Grooving of Silicon ————— 237
Hiromichi ONIKURA, Osamu OHNISHI, Kunio NISHIHARA, Tadayuki SAKASE, Yuki MORI, Heungkil PARK, Weichen KUO and Yuki FUJII
- Fundamental Study on Aerostatic Guidance ————— 242
—Analysis of an Air Flow in the Minute Orifice in Consideration of the Surface Roughness—
Peng ZHAO and Tadaatsu SATOMI
- Research on Micro Pressure Sensor Implanted into Transgenic Mouse (1st report) ————— 248
—Design and Manufacture of a micro pressure sensor and evaluation of fundamental characteristics—
Tomokazu NAGANO, Junji WATANABE, Mutsumi TOUGE and Atsushi YOSHIDA
- Measuring System for Photoelastic Constant of Optical Film ————— 253
Mitsuo TSUKIJI, Hiroyuki KOWA and Yoshiro TAJITSU
- Method of Pipe Resonance Suppression for an Air Type Anti-Vibration Apparatus ————— 259
Takayuki SHIRAISHI, Shinji WAKUI and Masato TAKAHASHI
- 3-D Measurement of Objects in Water Using the Light Stripe Projection Method ————— 265
Atsushi YAMASHITA, Hirokazu HIGUCHI and Toru KANEKO
- Study on Improvement Methods of CMM (Coordinate Measuring Machine) in Workshop Environment ————— 270
—Evaluation and Correction of Thermal Drift—
Tohru OHNISHI, Shotoku TAKASE and Kiyoshi TAKAMASU
- Development of an MRI Compatible Surgical Assist Manipulator using Spherical Ultrasonic Motor (1st report) ————— 275
—Prototype of the Spherical Ultrasonic Motor—
Tomoaki MASHIMO, Shigeki TOYAMA and Hiroshi ISHIDA
- Analysis and evaluation of tennis swings using computer vision ————— 281
Toshio ASANO, Kunihiro SATO, Hiroyuki HAMANO and Hajime HARA
- Study on Computer-Aided Process Planning of Mold Part Machining ————— 286
—An Algorithm for Determining the Optimal Cutting Direction for Deep Mold Machining—
Kuninori MORIMOTO and Masatomo INUI
