

Special Issue

Interface between Advanced Medical Technologies and Precision Engineering

Review

■ **Medical Technologies to Be Developed and the Role of Precision Engineering**

Takashi YAMANE511

Lecture

■ **Technology in the Development of the Stent**

Shinichirou KUBOTA, Seiichi YOKOMIZO, Koji MORI and Syuzo YAMASHITA515

■ **Application of the Robot Technology for Artificial Knee Joint Arthroplasty**

Koichi KURAMOTO, Mamoru MITSUISHI, Naohiko SUGITA and Takayuki INOUE520

■ **Mechano-bio Systems**

Fumihito ARAI, Yuching LIN and Yoko YAMANISHI524

■ **Solid Freeform Fabrication of Tissue Engineering Scaffolds**

Toshiki NIINO and Yasuyuki SAKAI528

■ **Recent Trend of Medical Support Robotic Systems and Expectation to Precision Engineering**

Hiroyuki HASHIZUME and Akio GOFUKU533

■ **My Experience in Precision Engineering**

Sansaku AOKI545

■ **Gravure & Interview**

TERUMO CORPORATION507
Hiromichi FUKASAWA/Hiromichi TANIOKA
Interview : Kazuhito OHASHI

■ **Introduction to Precision Engineering**

A Fascinating World of Hydrostatic and Aerostatic Bearings537
Hiroshi MIZUMOTO

■ **Introduction of Laboratories**

Advanced Machining Technology Laboratory, Department of Machine Intelligence and Systems Engineering, Akita Prefectural University541
Environmental Information and Microsystems, Department of Human and Engineered Environmental Studies, Graduate School of Frontier Sciences, The University of Tokyo543

- Editor's Note 告 5-17

Paper

- **Multi-point Micro-stereolithography Using Microlens Array** ————— 547
—Mass Production of Overhanging Structures—
Shinichi ABE, Hiroyuki NOGUCHI and Masao MURAKAWA
- **Trial Manufacturing of Productive Ultra-smoothness Vertical Surface Grinder Based on the New Concept (1st Report)** ————— 553
—Theory and Some Experimental Results—
Heiji YASUI and Yuki YAMAMOTO
- **Study on the Measurement of Physical Properties in the Metal Powder for Rapid Prototyping** ————— 558
—Proposal of the Measurement of Thermal Conductivity and Absorption of Laser Beam—
Tatsuaki FURUMOTO, Takashi UEDA, Akira HOSOKAWA, Satoshi ABE and Tomas H.C. CHILDS
- **Sculpture Surface Machining by Automatically Indexing Tilted Tool Axis on 5-axis Machine Tools (3rd report)** ————— 563
—Evaluation of tool attitude by analysis of cutting force on tilted tool axis ball end milling—
Makoto YAMADA, Fumiki TANAKA, Tsukasa KONDO and Takeshi KISHINAMI
- **In-Process Evaluation Method of Complex Change in Wheel Working-Surface Condition with Wet Grinding** ————— 568
Haruhisa SAKAMOTO and Shinji SHIMIZU
- **Influence of Oxidation Treatment on Solid Lubrication Property of Carbon Onion** ————— 573
Ryouichi YAMADA and Atsushi HIRATA
- **Relation between Drilling Conditions and Tool Life in Micro Drilling (2nd Report)** ————— 578
—Researches on Applying Ultrasonic Vibration on Machining Fluid—
Hitoshi OGAWA, Masahiro MASUDA and Akira MIZOBUCHI
- **Measurement of Dynamic Angular Error of a Rotation Axis of a Universal Spindle on Integrated Machine Tools by Using the Ball Bar Method** ————— 583
Soichi IBARAKI, Masahiro SAWADA, Atsushi MATSUBARA, Masahiko MORI, Keizo KASHIHARA and Yoshiaki KAKINO
- **Study of Process Planning based on Feature Dependency of Manufacturing Features (2nd Report)** ————— 588
—Improvement for Feature recognition and Creation of Feature Dependency with Manufacturing View—
Takashi INOUE, Takeshi KISHINAMI and Fumiki TANAKA
- **CAD Data Composition Method from 3D Sensed Data Based on Feature Extraction** ————— 593
Tatsuro YASHIKI, Noriyuki SADAOKA, Megumi SUNOU and Tarou TAKAGI
- **Dynamics of a Fly Line** ————— 600
—Behavior of rebound—
Tetsuya WATANABE and Kihachiro TANAKA
- **A Study on the Servo-stability of the Tandem Driven Machine with Linear Motors** ————— 605
Masatoyo SOGABE, Yasusuke IWASHITA, Naoto SONODA and Yoshiaki KAKINO
- **High Accuracy Repeatability of the Stage Position on a Stepper** ————— 611
Youzou FUKAGAWA
