

Special Issue

Cutting Edge of Ultrasonic Measuring Technology

Review

- Super-Precise Evaluation of EUVL-grade Ultra-Low-Expansion Glasses Using the Line-Focus-Beam Ultrasonic Material Characterization System

Jun-ichi KUSHIBIKI, Mototaka ARAKAWA and Yuji OHASHI.....673

Lecture

- Ultrasonic Measurement of Regional Elasticity of Arterial Wall

Hideyuki HASEGAWA and Hiroshi KANAI.....679

- Acoustic Measurement of Global Ocean Structure

Hiroyuki HACHIYA.....683

- Atomically Resolved Imaging by Frequency Modulation Atomic Force Microscopy Using Length Extension Quartz Resonator

Toshu AN, Toyoaki EGUCHI and Yukio HASEGAWA.....687

- A Novel Method for Noncontact Surface Topography by Air-coupled Ultrasound

Ikuo IHARA and Deden Dian SUKMANA.....691

- Functional Ultrasonic Transducers Using Polyurea Piezoelectric Films

Kentaro NAKAMURA.....696

- My Experience in Precision Engineering

Shoichi KURODA704

- Gravure & Interview

HONDA ELECTRONICS CO.,LTD669

Yoshiyuki ASAKURA and Nagaya OKADA

Interview : Takeshi MORITA

- Introduction to Precision Engineering

Environment and Its Control in Precision Processing and Measurements700

Masaji SAWABE

- Introduction of Laboratories

Nakamoto, Mishina and Ohmori Laboratory, Graduate School of Engineering, Chiba University.....705

● Information 775

● From the Lecture Committee告 7-1

● Editor's Note告 7-13

Paper

- **Optimization of Dresser Shape in order to Improve Flatness and Life of Pad** ————— 707
Yasutada NAKAGAWA and Eijirou KOIKE
- **Study on CAM Systems for Printed Wiring Boards** ————— 713
—Investigation of Drilling Tool Path Considering PWBs Temperature—
Toshiki HIROGAKI, Eiichi AOYAMA, Keiji OGAWA, Mitsutaka MATSUMURA and Seita SUMIDA
- **Formation of Patterned Electrode on Solid Polymer Electrolyte using Photolithography Technique** ————— 719
Kunitomo KIKUCHI, Shigeki TSUCHITANI, Masafumi MIWA and Kinji ASAKA
- **Surface Acoustic Wave Linear Motor Using Segment-Structured Diamond-Like Carbon Films on Contact Surface (1st Report)** ————— 724
—Deposition on Driving Surface and Driving Experiment—
Hiroyuki KOTANI, Yousuke FUJII, Masaya TAKASAKI, Yusuke ADACHI, Yuichi AOKI, Naoto OTAKE and Takeshi MIZUNO
- **Study on Cutting Characteristics under a Nitrogen Atmosphere** ————— 730
—Improvement of The Adhesion Problem and Effect on Tool Wear—
Hiroo SHIZUKA, Yasuo SUZUKI and Katsuhiko SAKAI
- **A research on the Evaluation of Grindability of Fine-ceramics by Constant Pressure Grinding (2nd Report)** ————— 735
—Evaluation of the Grindability based on Change of Removal Rate—
Takekazu SAWA, Yasuhiro NAGATO, Yasushi IKUSE and Kuniaki UNNO
- **Study on Detection Technique for Jetting Failure of Piezo-Driven Inkjet Heads** ————— 740
Tsuyoshi SATO and Toshiro HIGUCHI
- **An Integrated MEMS Hematology Chip** ————— 746
Rikiya TANABE, Seiichi HATA and Akira SHIMOKOHBE
- **Efficient Mesh Segmentation base on Region Growing and Merging** ————— 752
Tomohiro MIZOGUCHI, Hiroaki DATE and Satoshi KANAI
- **Efficient Walking Using Natural Dynamics and Delayed Stepping Reflex** ————— 760
Yuji OTODA, Kunikatsu TAKASE and Jia SONGMIN
- **Development of Gyroscopic Power Generator** ————— 764
Tomohiro ISHII, Yuji GOTO, Tatsuya OGAWA and Hiroshi HOSAKA
- **Positioning Control Using Pressure Feedback and Series Compensator for Pneumatic System** ————— 769
Shinji WAKUI and Ryotaro TADA
