

Special Issue

Japanese X-ray Free Electron Laser Project and Role of Precision Engineering

Review

- X-Ray Free Electron Laser Tetsuya ISHIKAWA 1375

Lecture

- High Gradient C-band Linear Accelerator Technology for X-ray FEL
Tsumoru SHINTAKE 1379
- In-vacuum Undulators as Japanese Original Synchrotron Radiation Sources
Hideo KITAMURA 1383
- Development of Long Focusing Mirror for X-ray Free Electron Laser
Hidekazu MIMURA, Kazuto YAMAUCHI and Hitoshi OHMORI 1387
- Technology of Precise Irradiation Timing for X-ray Free-Electron Laser (XFEL)
Yuji OTAKE 1391
- Facility Construction Supporting the Performance of XFEL Takashi OTSUKA 1396
- Measurement Technology for Displacement of Building That Supports XFEL Performance
Hiroaki KIMURA and Sakuo MATSUI 1400

- Gravure & Interview
RIKEN-JASRI Joint Project for SPring-8 XFEL 1371
Makina YABASHI
Interview : Kazuto YAMAUCHI

- Introduction to Precision Engineering
Chemical Analysis Using Micro Space 1404
Hizuru NAKAJIMA, Katsumi UCHIYAMA and Toshihiko IMATO

- Introduction of Laboratories
Tsuchiya Laboratory, Institute of Industrial Science, The University of Tokyo 1409
Tribology Laboratory, Department of Mechanical Engineering, Tokyo University of Science 1411

- Awards
 - JSPE Prize
 - JSPE Technology Award
 - JSPE Young Engineer Award ..following pages
- JSPE Report 1484
- International Conference Report 1482
- Corporate Members 1495
- From the Lecture Committee 告 12-1
- Editor's Note 告 12-11

Paper

- **Effect of Cutting Tool Sliding on Cutting Phenomena (1st Report)** ————— 1413
—Influence on Chip Formation and Cutting Force—
Toshiroh SHIBASAKA, Harun SURYADIWANSA, Naoyuki EDA and Toshimichi MORIWAKI
- **Fundamental Analysis of a Cycloid Ball Reducer (5th Report)** ————— 1418
—Development of a Two Stage Type Reduction Mechanism—
Hidetsugu TERADA and Kenji IMASE
- **Development of Wheel Surface Forming Technique for Ultra-smoothness Vertical Surface Grinding Method (2nd Report)** ————— 1423
—Investigation on Truing and Dressing Method for Long Wheel Life—
Ryushiro SAKAMOTO, Heiji YASUI and Shigehiko SAKAMOTO
- **High-speed Micro Drilling on Printed Circuit Boards** ————— 1428
—Influence of PCB Composite Material on Drill Breakage—
Hidehito WATANABE, Hideo TSUZAKA and Masami MASUDA
- **Fabrication of AWG for the CWDM by the Casting Method using a Micro Die (1st Report)** ————— 1434
—Fabrication Process of Arrayed Waveguide Grating—
Kazushi OKADA, Hideo WATANABE, Fumikazu OOHIRA, Yutaka MIHARA, Takaaki SUZUKI and Kazufumi OGAWA
- **Wear Mechanism of TiSiN-Coated Cutting Tools on High-Speed Cutting of Hardened Die Steel** ————— 1439
Takeshi ISHIKAWA, Fumio OBATA and Kenichi INOUE
- **Package Inspection of Semiconductor Chip using 2D Brightness Distribution** ————— 1444
Hitoshi WAKIZAKO and Masahiro INOUE
- **Laser Peen Forming with Femtosecond Laser** ————— 1449
—Influences of Irradiation Conditions and Prebending on Thin-Sheet-Metal Bending—
Yoshihiro SAGISAKA, Masayoshi KAMIYA, Minoru MATSUDA and Yukihiro OHTA
- **Fabrication of Transparent Parts by Laser Sintering Process** ————— 1454
—Transparentization of laser sintered plastic parts by infiltrating thermosetting epoxy with tuned refractive index—
Toshiki NIINO and Hidenori YAMADA
- **Five Axis Control Machining of Surface Texture with Regular Pattern** ————— 1459
Akira HAYASHI, Yoshikazu KOBAYASHI, Kenji SHIRAI and Yasuhiko HARA
- **Dynamics of a Fly Line** ————— 1464
—False cast—
Tetsuya WATANABE and Kihachiro TANAKA
- **Observations on the Behavior of Bubbles Generated by Laser Focusing in a Piezo-Driven Inkjet Head** ————— 1470
Tsuyoshi SATO and Toshiro HIGUCHI
- **Development of a Micro Hole Measuring System Using an Optical Fiber Probe (1st Report)** ————— 1476
—Optical Analysis and Accuracy Evaluation—
Hiroshi MURAKAMI, Akio KATSUKI, Hiromichi ONIKURA, Takao SAJIMA and Eiji KONDO
