

**Special Issue**

## Precision Engineering for Safety and Security

**Review**

- Paradigm Shift of Safety and Security in Design Haruo NAKAMURA .....333

**Lecture**

- Measures against Flange Climb Derailment of Railway Vehicles Hiroaki ISHIDA .....337

- Roll Over Protective Structure (ROPS) for hydraulic excavator Kenzo TANAKA .....341

- The Safety Device and the Wire Rope Technology for High Rise Building Elevator  
Akira OSADA and Hidehiko KOBAYASHI .....346

- Development of the Brake for Cars, Which Contribute to Safety  
Toshitaka SUGA, Kazuya MAKI and Hiroyuki KODAMA .....351

- Application of Nondestructive Inspection Techniques for Maintenance Inspection  
Mitoshi YOTSUTSUJI .....355

- Deterioration Diagnosis and Inspection Technology for the Lubricating Oil  
Tomomi HONDA .....359

- My Experience in Precision Engineering  
Koya TAKAZAWA .....367

- Gravure & Interview  
Kashiwazaki Kariwa Nuclear Power Station, Tokyo Electric Power Company .....329  
Hiroto KATAOKA/Akio TOBA  
Interview : Tomohisa TANAKA

- Introduction to Precision Engineering  
Measurement of Surface Topography Using SEM with Four Secondary Electron Detectors .....363  
Yoshio TAGUCHI and Yukiko OMATA

- Introduction of Laboratories  
Saitama Industrial Technology Center .....368  
Human Environmental Support Laboratory, Department of Human and Engineered Environmental Studies,  
Graduate School of Frontier Sciences, University of Tokyo .....370

- Corporate Members ..... 446
- JSPE Membership Guidance ..... 372
- Information ..... 448
- From the Lecture Committee .....告 3-1
- Editor's Note .....告 3-11

## Paper

- **Machining Accuracy of Punching for Thin Sheet Metal** ————— 373  
—Influence of Tool Position Misalignment and Its detection—  
Yoshiyuki KIBE and Kimiyuki MITSUI
- **Development of the Translational and Rotational Piezoelectric Actuator using a Single Stator (2nd report)** ————— 379  
—Characteristics of the TR Motor—  
Tomoaki MASHIMO and Shigeki TOYAMA
- **Nanoscopic Mechanical Removal Processing of Nano-sheet by AFM Probe (3rd Report)** ————— 385  
—Theoretical Formula Based on Energy Dispersion for the Optimal Scanning Speed in the Groove Machining Process—  
Kazuya DEMURA, Yoshiteru KAWAKAMI and Tohru IHARA
- **Cutting Process Considering the Surface Plastic Flow Remaining on a Machined Surface** ————— 390  
Kanou YOSHIDA and Junichiro MINATO
- **Development of a System to Predict tool Wear Considering Cutting Conditions and Workpiece Components** ————— 396  
Koichi AKAZAWA, Katsuhiko OZAKI and Eiji SHAMOTO
- **Study on Alternating Torsion P-S-N Test and Fatigue Limit Evaluation for Bearing Steel** ————— 402  
Hiroshi OHZEKI, Shigeo SHIMIZU, Kazuo TSUCHIYA and Katsuji TOSHA
- **Improvement on Injection Molded Products Appearance by Induction Heating Mold** ————— 407  
Yasuhiko MURATA, Kentaro KINO, Hiroki HIDA, Takuya AKAIKE and Taihei YOKOTA
- **Development of Servo-clinometer with Rotary Encoder and Electronic Level** ————— 412  
Kazuya TAKAHASHI, Chengri CUI, Masaomi TSUTSUMI and Ryuta SATO
- **Structural Mechanical Analysis and Evaluation for Extension of Teeth Lifetime** ————— 418  
—Verification on Correlation of Tooth Disease and Stress Concentration—  
Takao HIGASHIMACHI, Kenichi SUGA and Hisato SASAHARA
- **Development of Manufacturability Verification System for Assisting Mold Design** ————— 424  
—Detection of Unmanufacturable Form Features with Casting Shape Errors—  
Masatomo INUI and Yuji OTOMO
- **A Study on Extending Boundary-Representation for Robust Blending (1st report)** ————— 430  
—Blending for Three-Edge Vertex Case—  
Norio MATSUKI, Yoshiyuki FURUKAWA and Fumihiko KIMURA
- **Study on Strain Distribution Measurement using Digital Image Correlation Method** ————— 437  
—Experimental Examination of Measurement Accuracy and Localization of Fatigue Crack under High Strain Conditions—  
Michio UNEDA, Setsuo IWATA, Masakatsu MATSUI, Satoshi ASHIDA, Jun OKADA and Ken-ichi ISHIKAWA

## Short Article

- **Laser Cleaving of Wafer for Electric Devices** ————— 443  
Takashi UEDA, Kunishige TANAKA, Shingo NISHIOKA, Keiji YAMADA and Akira HOSOKAWA
