

**Special Issue**

## Product Servicizing and Product Development in Manufacturing

**Review**

■ **Manufacturing Servicification and Future Products Development**

Yoshiki SHIMOMURA .....453

**Lecture**

■ **e-Learning System and Content Development towards the Improvement of Service Quality**

Yoshiki SAKURAI .....457

■ **H-2A Launch Services for Commercial Satellites**

Shoichiro ASADA .....461

■ **An Engineering Approach to Service Business Innovation**

Chiaki HIRAI .....466

■ **Service Design and Evaluation Methodology for Product Service Systems**

Naoshi UCHIHIRA, Hideki KOBAYASHI and Rintaro NAKANE .....471

■ **"@Remote"—A New Remote Service for Networked Output Devices and Its System Development**

Reiko NODA .....475

■ **My Experience in Precision Engineering**

Koya TAKAZAWA .....484

■ **Gravure & Interview**

Information and Robot Technology Research Initiative, The University of Tokyo .....449

Isao SHIMOYAMA

Interview : Masao SUGI

■ **Introduction to Precision Engineering**

High-power Ultrasonic Transducers—A Designing Method for Bolt-clamped Langevin-type Transducers and Its Application— .....479

Kazunari ADACHI

■ **Introduction of Laboratories**

Endo Laboratory, Center for Ultra-Precision Science and Technology, Graduate School of Engineering, Osaka University .....485

Oohira Laboratory, Department of Intelligent Mechanical Systems Engineering, Faculty of Engineering, Kagawa University .....487

● JSPE Membership Guidance ..... 告 4-11

● From the Lecture Committee ..... 告 4-1

● Editor's Note ..... 告 4-10

## Paper

- Study on the Copper-Chemical Mechanical Polishing Method Using Water-Soluble Fullerenol Slurry —Investigation of Polishing Performance— 489  
Hideyuki TACHIKA, Yasuhiro TAKAYA, Terutake HAYASHI, Hiroki TANADA, Ken KOKUBO and Keisuke SUZUKI
- Development of Abrasive-Free Copper CMP Process —Reduction of Copper Residue Using Randomly Formed Polyurethane Pad— 496  
Yohei YAMADA, Nobuhiro KONISHI, Shuhei KUROKAWA and Toshiro DOI
- Development of 6DOF Magnetic Levitation Stage for Lithography Tool —Background and First Report— 501  
Keiichi TANAKA
- Real-Time Balancing Mechanism Using Magnetic Fluid for a Machine Tool Spindle —Proposal of Real-Time Balancing Mechanism and Verification Based on Test Spindle— 509  
Keiichi NAKAMOTO, Satoshi HORII, Kazuhiko ADACHI and Keiichi SHIRASE
- Development of Evaluation Method of an Overlay Error for 3D Microfabrication Technology 514  
Takayuki YAMADA, Mutsuya TAKAHASHI and Kimiyuki MITSUI
- Measurement of the Copying Rate of Tool Edge Motions by Using a Measurement-Fused Machining System 520  
Daisuke KONO, Atsushi MATSUBARA, Yusuke KOIKE and Iwao YAMAJI
- A Study of Run-out of Externally Pressurized Air Bearing —Analysis of Run-out Based on Profile Error of Spindle Radial Direction— 525  
Hiroataka TOMITA, Masaaki TAKAHASHI and Kouichi KOIZUMI
- Planning Method of Tool Posture in Continuous 5 Axis Control Machining Using 2D Rectangular Coordinates System Corresponding to Rotation Angles of Rotary Tables in Machine Tool —Visualization of Collision Between Cutting Tool and Workpiece Surface and Positions of Three Translation Axes— 530  
Jun'ichi KANEKO
- An Analysis of Particles in Spray Cleaning and A Study on their Cleaning Efficiency —A Comparison of Cleaning Efficiency between Two Fluid Spray and High Pressure Micro Jet Spray— 536  
Keiji MIYACHI, Syuhei KUROKAWA, Yoshiyuki SEIKE, Yoshinori KOBAYASHI, Hiroyuki YAMAMOTO and Toshiro DOI
- Improvement of Isolated table Using Auxiliary Tank 542  
Masato TAKAHASHI and Shinji WAKUI
- A Development of an Ergonomic Assessment System by Integrating a Digital Hand with a Product Model (2nd Report) —A Function of Grasp Stability Evaluation and an Optimization Method for a Grasp Posture— 548  
Yui ENDO, Satoshi KANAI, Natsuki MIYATA, Makiko KOUCHI and Masaaki MOCHIMARU
- Euclidean Symmetry Detection from Scanned Meshes of Mechanical Objects based on a Combination of ICP and Region Growing Algorithms 554  
Tomohiro MIZOGUCHI and Satoshi KANAI
- Wide Bandwidth of Absolute Velocity/Displacement Sensors and Its Application to Vibration Isolated Table 561  
Shinji WAKUI, Takashi KAI and Daisuke KOJIMA
