

Special Issue

## Advanced Hard Materials

Review

- Recent Development Trend and Future Challenge of Hard Material Akira OSADA ..... 1315

Lecture

- Novel Development of High-pressure Synthetic Diamond Hitoshi SUMIYA ..... 1319

■ Nanocrystalline Diamond Coatings

- Masataka HASEGAWA, Kazuo TSUGAWA, Masatou ISHIHARA, Jaeho KIM,  
Takatoshi YAMADA and Yoshinori KOGA ..... 1324

- High Pressure Synthesis of Binder-less Fine-grained Cubic Boron Nitride Sintered Bodies and Their Properties Takashi TANIGUCHI ..... 1329

- Recent Developments of Cermet as Cutting Tools Kazuki OKADA ..... 1333

- Ceramics Coating for Cutting Tools by CVD and PVD Kazuyuki KUBOTA ..... 1336

- My Experience in Precision Engineering  
Sadamasa ANMI ..... 1349

- Gravure & Interview  
Electronics & Materials R & D Laboratories, Sumitomo Electric Industries, LTD. .... 1311  
Hitoshi SUMIYA  
Interview : Atsushi HIRATA

- Introduction to Precision Engineering  
Additive Manufacturing Technologies—From Rapid Prototyping to Rapid Manufacturing— ..... 1340  
Toshiki NIINO

- Introduction of Laboratories  
Robotics Lab., Department of Intelligent Mechanical Engineering, Hiroshima Institute of Technology ..... 1345  
Industrial Research Institute of Ishikawa ..... 1347

- Awards
  - JSPE Prize
  - JSPE Technology Award
  - JSPE Young Engineer Award ... following pages
- International Conference Report ..... 1411
- JSPE Affiliate News ..... 1350
- JSPE Membership Guidance ..... 1414
- Information ..... 告 12-12
- From the Lecture Committee ..... 告 12-1
- Editor's Note ..... 告 12-10

## Paper

- Acquisition of Locomotion for Modular Robot With Annular Shape Using Evolutionary Computation ————— 1351  
Keisuke YONEDA, Ikuo SUZUKI, Masahito YAMAMOTO and Masashi FURUKAWA
- Fundamental Analysis of Elliptical Motion Input Type Ball Reducer ————— 1358  
—Motion Principle of  $1/m$  Speed Input Cam Type—  
Masami MIZUKAMI and Hidetsugu TERADA
- Ultraprecision Positioning by New Type of Linear Motor Drive ————— 1364  
—Challenge to Sub-nanometer Positioning Resolution by Paying Attention to Electric Current Control System—  
Toshiharu TANAKA, Jiro OTSUKA, Ikuro MASUDA, Yuuichi ITOU and Yasuaki AOYAMA
- Influence of Ball Behavior in Ball Screws on Lost Motion (1st Report) ————— 1371  
—Experimental Device and Measurements of Ball Rolling Behavior and Lost Motion—  
Masahiro UEDA and Hirokazu SHIMODA
- Distribution Ratio of Hob Wear in Cutting Process of Cutting Chip ————— 1377  
—Fundamental Experiments Using Fly Tools—  
Hironori MATSUOKA and Takahiro RYU
- High-aspect-ratio Microdrilling with UV Laser Ablation III. ————— 1383  
—Influence of Pulse Width on Hole Profile—  
Hirofumi HIDAI, Sho ITOH and Hitoshi TOKURA
- Effect of Loading Mode on Fracture Strength of High Speed Tool Steel for Tap ————— 1388  
Sadayuki AKAKI, Tadaaki SATAKE and Takenobu TAKEDA
- Surface Treatment of Fine Grain Cemented Carbide by Large-area Electron Beam Irradiation ————— 1393  
Ryoji KITADA, Akira OKADA, Yoshiyuki UNO and Hongge GUO
- Maintenance Planning in Re-entrant Flow Shop (2nd Report) ————— 1398  
—Application of Multi-start Greedy Method and Verification Test—  
Youichi NONAKA, Attila LENGYEL, Yuuichi SUGINISHI, Kouichi SUGIMOTO, Rieko AIZAWA, Natsuko YANO, Masaki KATO, Toshiya KAIHARA, Nobutada FUJII and Takako KURANO
- Cutting Process Design for Minimizing Workpiece Displacement at Cutting Point ————— 1406  
Yusuke KOIKE, Atsushi MATSUBARA, Shinji NISHIWAKI, Kazuhiro IZUI and Iwao YAMAJI
